SALIENT FEATURES

- Super Seeder is a single pass solution to fulfill current farming sowing needs to stop crop residue burning.
- Simple & easy metering system that allows changing of seed varieties with less seed waste and provides better germination.
- Metering device is designed with a combination of aluminum & cast iron for better performance & durability. Fluted roller type design is controlled by a single lever, very simple & efficient.
- Combination of seed planter and rotavator, easy to operate & handle, and low on maintenance
- Specially designed blades leading to very efficient tackling of stubbles & crop residue.
- Spherical wire embedded transparent PVC pipes are used as seed & fertilizer pipe for long life and durability.

BENEFITS

- Super Seeder is a combination of Rotavator & Seed Planter with press wheels.
- Extensively used for planting a wide variety of seeds like wheat, soybean & grass.
- Useful for removing stubble & roots of Paddy, Sugarcane, Cotton, Banana, Maize etc. and of various other crops.
- Can also be used as a stand-alone rotavator with quick change time.
